

Reliable

High operational reliability through the use of chemically resistant materials

Cost effective

Optimal storage through reliable measurement

User friendly

Simple setup and commissioning

Storage tanks for additives

Level measurement and point level detection in storage tanks for additives

For many processes, additives such as sulfuric or hydrochloric acid are required. These are kept ready for use in storage tanks. Level measurement is needed here to ensure availability of the additives.

[More details](#)

VEGAPULS 6X

Non-contact level measurement with radar in storage tanks

- Exact measuring results, independent of media properties
- Highly corrosion resistant materials ensure a long service life
- Maintenance-free operation through non-contact measuring method

[Show Product](#)

VEGASWING 63

Vibrating level switch as overflow protection in storage tanks

- Product-independent switching point ensures exact detection of limit level
- Simple setup without adjustment
- Test button for easy checking of the measuring instrument during operation
