

#### Reliable

Reliable content measurement of alumina

#### **Cost effective**

Maintenance-free operation

## **User friendly**

Simple mounting and setup

# Alumina powder silo

# Level measurement and point level detection in alumina powder silos

The alumina powder is kept ready in storage and day silos for subsequent smelting. Aluminium smelting is carried out in the fused salt electrolysis process, where pure liquid aluminium is extracted from aluminium oxide. Optimal storage is ensured by level measurement and point level detection.

More details

# **VEGAPULS 6X**

Non-contact level measurement with radar in storage silos

- Reliable measurement, unaffected by dust
- Easy sensor alignment via aiming flange and alignment app for smartphone
- Maintenance-free operation thanks to encapsulated antenna system

# **Show Product**

#### **VEGAWAVE 62**

Vibrating level switch as overfill protection in storage silos

- Reliable function through product-independent switching point
- Immune to buildup
- Simple setup without adjustment
